

## Quiz-2

CLO-3 (Demonstrate the concepts of React Native & React Navigation in the context of mobile application development)

### Question 1:

Apply the concepts of react navigation to create an app with 2 screens Sc1, Sc3.

The first screen should be Sc3.

Sc3 should display the username passed to it as a param. And on a button click it should pass this param to Sc1.

On Sc1, allow the user to update the param value.

Add the screen in Stack Navigation.
